

Our Health Survey of Attendees of APTHSC10

Thanks to all those who responded to our small health survey following APTHSC10 in Vietnam. With 143 responses, that represents about a 30% response rate- pretty good for a membership of busy health professionals!

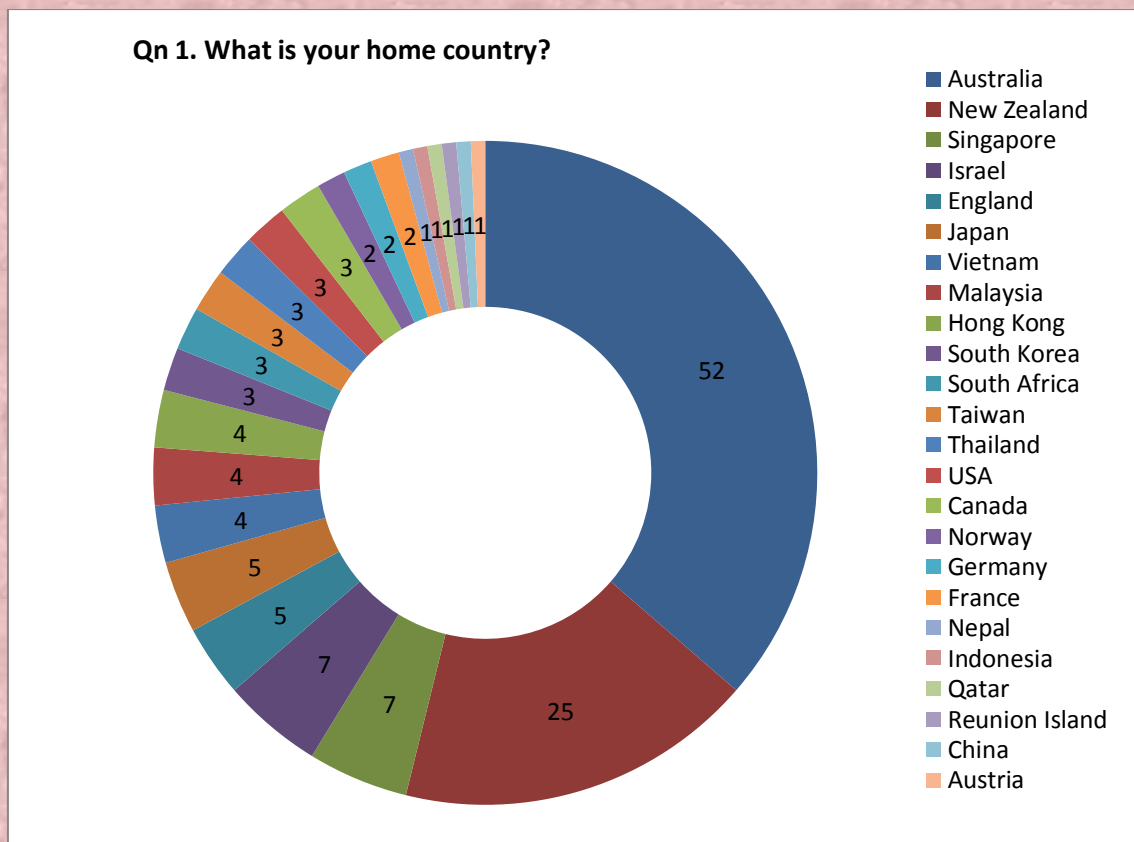

Of all our respondees, 63.6% of you spent more than 6 days in the region, and 60% travelled around.

Overall, 22.3 % reported health issues, mostly minor, with TD being the predictably highest individual affliction, affecting about 13% of responders.

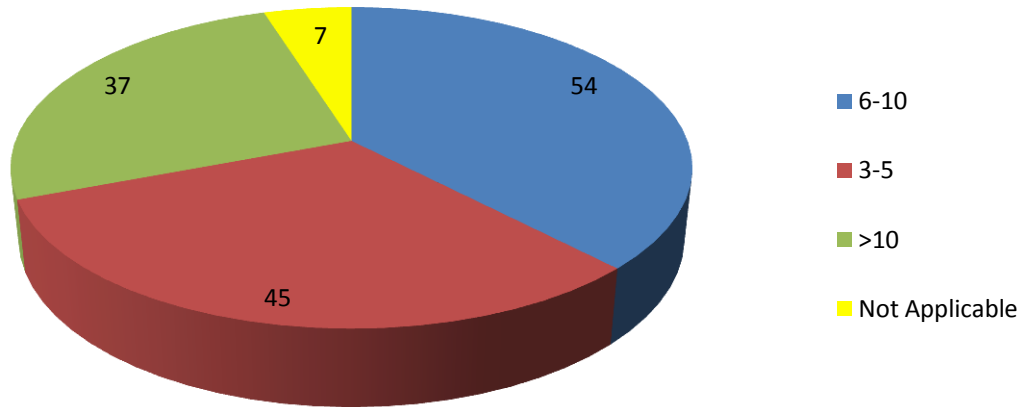

Luckily no major health issues were apparent, although 2 individuals reported being bitten by an animal and another being licked by a dog! Let's hope these potential exposures were managed appropriately.

Safe travels, see you in Kathmandu.

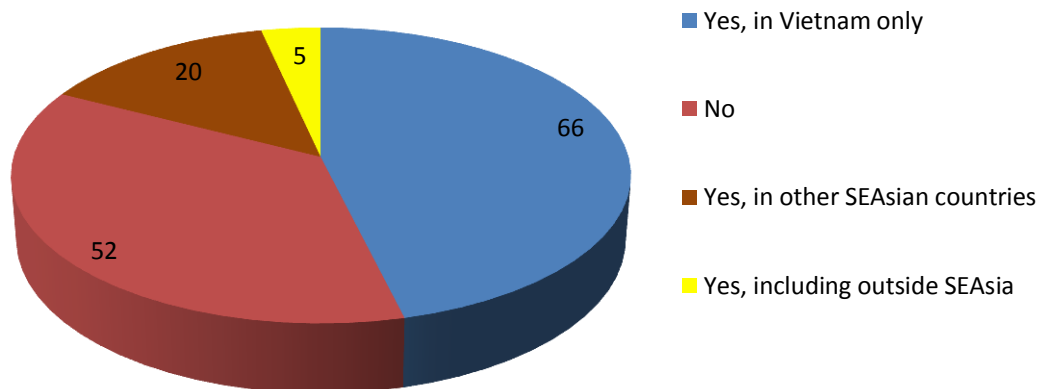

**All the figures are based on number of responses*

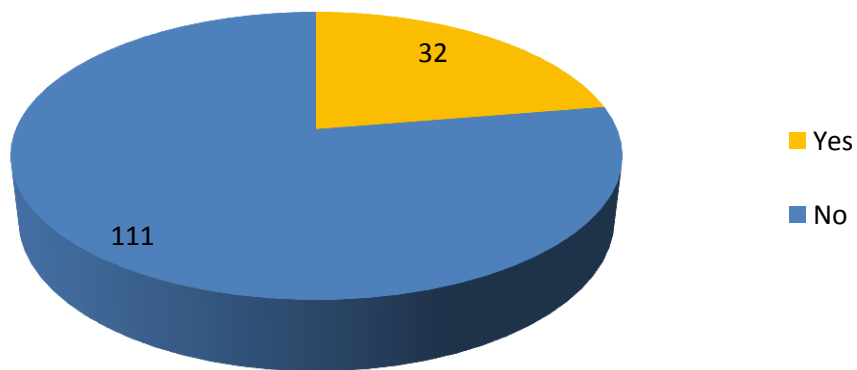

Qn 2. If you came from outside Vietnam, how many days did you spend in Vietnam?

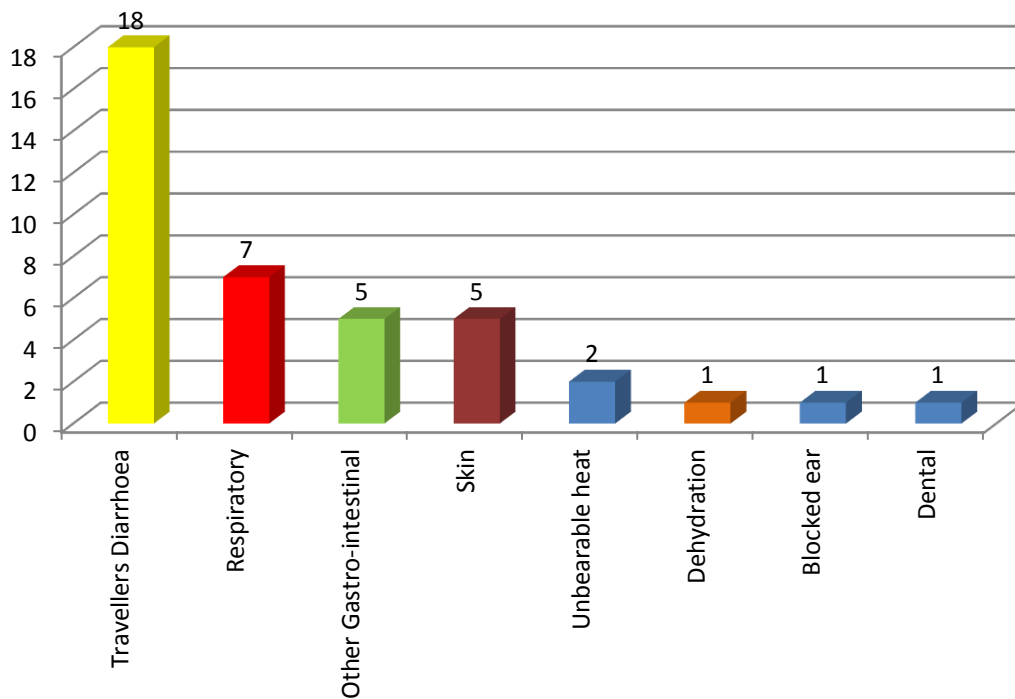

Qn 3. Did you do any other travel, before or after, adjoined to the conference?

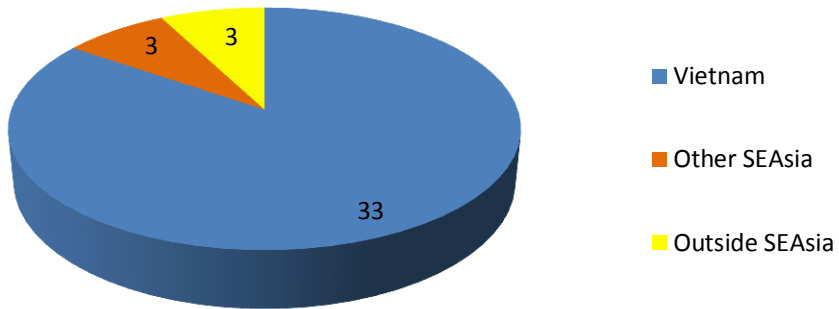

Qn 4. Did you experience any illness or injury while travelling?
